Index to Selected Abstracts, Series II

Explanatory Note

The following Index is divided into four parts;

1. An Index of Subjects mentioned in the bibliographies and Abstracts of Series II of the Selected Abstracts; 2. An Index of Persons who were mentioned in the Abstracts as authors or scientific contributors; 3. An Index of Soviet and other biomedical institutes and facilities from which the original material originated or which were mentioned in the course of the original article; and 4. An Index of Geographical Places mentioned in the Abstracts.

The numbers following each entry refer to the Number of the Abstract. An underlined number, v. g. 607, 785 indicates that the article was not abstracted but quoted by title only.

Because of insufficient data it has not always been possible to identify the author names accurately. In this case it seemed preferable to list variant spellings separately rather than guess which is the more correct. This is also true with regard to Institutes and other biomedical facilities. Where possible they have been grouped. Where the data is questionable, separate entries have been made.

W. C. Jaskiewicz, S. J., Ph. D.
Editor

INDEX OF SUBJECTS

Abyssinian vaccinal
 strains, 641
 Acaricide "Efiran-B", 188-22
 Acaricides, 128-4, 830-25
 Acethylhydrochinoline, 583
 ACTH, 3
 Adenocorticotropic hormone,
 313
 Adeno-virus, 785-6
 Aedes vexans, 860
 Aerobacter aerogenes, 558
 Aerosol cylinders, 864
 Aerosols, 142, 531, 542
 bacterial, 143
 hexachlorane, 84-14
 production of, 600
 African horse plague, 641
 virus-vaccine against, 642
 African plague, 688
 swine plague, 710
 trypanosomiosis, 866
 Agar gel precipitation
 reaction, 612
 Agar precipitation method,
 813-8

Agglutination reaction,
 319, 708, 733-3
 liters, low, 644
 Agglutinins, 825-12
 Alacurt (Vermipsylla
alacurt), 451
 Albomycin, 516
 Aldolase activity, 244,
 245, 857-12
 Alimentary infection, 7
 53, 813-103, 899, 930-59
 Alizarin suspension, 660
 Allergens, tick-borne
 encephalitis, 106
 American mink (Lutreola
vison), 857-43
 Amino-acids, 858-18
 peptide agar, 412
 Amniazin, 27
Amphalius runats, 233
Am. runatus, 250
Amphalius runatus, 857-3
Amphipsylla asiatica,
 428
Amphipsylla germani

Sp.nova (Suctoria), 857-29
Amphipsylla primaris, 857-3
Amphipsylla vinogradovi,
 858-31
Am. primaris nitis, 250
 Anaerobic anatoxins, 563
 Anamnestei reaction, 231-9
 Anatoxins, 67
 Angiosarcoma, 785-2
 Animals Tuberculosis, 686
Anopheles maculipennis, 860
Anoplura, 127
 Antelopes, 88-37
 Anthracoids, 96
 Anthrax, 138, 141-A3, 170,
 174, 208, 383, 407, 821
 antigens, 325
 bacilli, 317, 726, 838
 bacillus, 698
 cutaneous form, 141-A1,
 536
 diagnosis of, 280, 500,
 617, 635
 epidemiology and clinique
 of, 792
 epidemiology, diagnosis
 and prophylaxis of,
 413-13
 experimental, 141-A2
 fight against, 381-5
 immunity to, 73
 in animals and man, 171
 infection, 737
 spores, destruction of,
 746
 strain, 550
 vaccine, 381-6
 anti-, sera, 838
 Anthraxin (anthrax allergen),
 131
 Anti-bacterial rabbit sera,
 800
 Antibiotic-producing es-
 tablishments, 804
 Antibiotics, 47, 48, 87-17,
 87-28, 88-2, 92, 119-Aad
 119-As, 119-Av, 119-Ca,

 759, 813-80, 821, 822,
 825-12, 825-15, 825-18,
 825-20, 825-22
 distribution of, 594-3
 influence of, 930-10
 neomycin group, 594-1
 production of, 574
 of tetracycline series,
 291, 346
 Antibodies, 124, 217, 376-4,
 376-32, 388, 570, 592-26,
 806, 830-15, 859-E9, 871,
 930-37
 against brucellosis, 670
 anti-hemagglutinating, 396
 complement-fixing, 32-j,
 396
 fluorescent, 87-23, 116
 in blood sera, 87-4
 observation of, 32-v
 production of, 216
 tick-borne encephalitis,
 32-h
 to tick-borne encephalitis,
